You're travelling down a stretch of country road with the windows down, inhaling fresh air. Returning to the city, your heart is filled, restored. You crave the warm comfort of country living, but with a personal, contemporary touch. It's elevated, fused with a worldly, sophisticated, flair. The result is the freshness of country injected with your contemporary style. It's uptown, yet down to earth, just like you. UpCOUNTRY, from Garage Living's Designer Series, starts with a warm, relaxed color palette. It's cultivated from nature, then elevated with a sophisticated, contemporary edge that perfectly expresses your signature style.
